

Areeg Mohammed Elbourhamy

Medical Student | Data Analytics | Healthcare Research | Student Leadership

Egypt | [+201605807879] | [areeg.elbourhamy@gmail.com] | [\[LinkedIn\]](#)

PROFILE

Medical student with a developing background in data analytics, healthcare research, technical projects, and student leadership. Skilled in Power BI, Excel, SQL, Python, Power Query, and DAX, with hands-on experience in data analysis, dashboard development, data modeling, and IoT-based monitoring systems. Led a 300+ student community and multidisciplinary technical projects, combining analytical thinking, scientific research, and team leadership.

EXPERIENCE

STUDENT LEADERSHIP EXPERIENCE

Resala STEM — Team Leader

- Led a 300+ student volunteering community, coordinating volunteers, activities, and volunteering days.
- Managed team organization and member coordination while supporting recruitment, engagement, and performance improvement.
- Contributed to improving the team's ranking from 33rd to 2nd place through effective coordination and team management.
- Recognized among the Best Leaders for leadership performance and contribution.

Hack Club — App Development Team Leader

- Led app-development learning activities for students ranging from complete beginners to independent project developers.
- Designed and delivered project-based app development sessions for 30+ students, supporting learners from beginner level to independent project development.

DATA ANALYSIS EXPERIENCE

Digital Egypt Pioneers Initiative (DEPI) — Data Analysis Track

July 2026 – Present

- Currently completing professional training in Data Analysis, developing practical skills in Excel, SQL, Power BI, DAX, Power Query, Python, and data visualization.
- Apply data-cleaning, transformation, analysis, and visualization techniques through hands-on projects and case studies.
- Build end-to-end analytical solutions covering data preparation, modeling, KPI development, visualization, and data storytelling.

RESEARCH & TECHNICAL EXPERIENCE

1. Integrated Sensing for Span Stability

Project Leader & Technical Lead (2024-2025)

- Led the development of an integrated sensing system for monitoring structural stability, load, and deflection in bridge structures.
- Led sensor selection, system integration, data acquisition, and structural-data analysis.
- Led the analysis and interpretation of sensor data to identify changes in structural conditions and potential safety risks.

2. Wastewater Treatment for Agricultural Reuse

Research Team Leader & Scientific Lead (2023-2024)

- Led wastewater-treatment research using physical separation, chemical precipitation, and biological oxidation for agricultural reuse.
- Led the preparation of the project's scientific writing, research documentation, and final presentation.

EDUCATION

- **Tanta National University — Faculty of Medicine**
Bachelor of Medicine and Surgery (MBBCh) | Expected 2032
- **Ghrabiya STEM High School**
STEM Education | [2022-2025]

EXTRACURRICULAR ACTIVITIES & ACHIEVEMENTS

DECI — Level One | 2022–2023

Participated in the program, developing technical and soft skills through structured learning and practical activities.

DECI — Level Two | 2023–2024

Advanced participation in the program with further development of technical and project based skills.

Biogenesis Competition | 2023

2nd Place — Competed in a scientific competition focused on biology and life sciences.

Financial Literacy for Youth Program | 2022

Participated in a youth financial literacy program covering fundamental concepts of financial awareness and personal financial management.
